

BHAVIK JADAV

Tech Lead / Team Lead (.NET | Cloud | Fintech | AI)

☎ +44 7721 950934 ✉ imbhavikjadav@gmail.com 🌐 Norwich, United Kingdom

PROFESSIONAL SUMMARY

Tech Lead with 9+ years of experience delivering scalable, customer-facing platforms in financial services and healthcare domains. Proven track record of leading cross-functional teams, building complex digital journeys from scratch, and improving user experience and conversion at scale. Currently working onsite in the UK with Aviva, leading wealth platform journeys (ISA, SIPP, Aviva Save, Pension Drawdown). Strong expertise in modern .NET, cloud-native architecture (AWS), and data-driven optimisation using observability and analytics tools. Leveraging AI tools to accelerate development and improve solution design.

WORK EXPERIENCE

Tech Lead / Team Lead

Tata Consultancy Services (Client: Aviva UK – Direct Wealth)

Jun 2022 – Present

Norwich, United Kingdom

- Led delivery of customer-facing wealth journeys including ISA, SIPP, Pension Drawdown, Find & Combine, and Aviva Save used by UK customers
- Managed a cross-functional Agile team (~12 engineers and QA) ensuring high-quality, scalable releases
- Rebuilt core navigation architecture for complex journeys
- Reduced user drop-off and error rates by 50%+
- Designed and implemented a real-time Splunk dashboard
- Enabled monitoring of failures and business metrics
- Identified user friction points and improved journey performance
- Identified and resolved critical production issues, improving conversion rates and platform stability
- Led fortnightly production releases, ensuring smooth and reliable feature delivery
- Collaborated with Product Owners, Proposition Managers, Architects, and Business Analysts to define and deliver customer-centric solutions
- Conducted solution workshops to continuously enhance digital customer journeys

Senior Software Engineer / Tech Lead

Allscripts India LLP

Oct 2018 – Jun 2022

Vadodara, India

- Led a team of 8 engineers delivering enhancements to enterprise healthcare systems
- Integrated eCRNow (Java-based reporting system) with EHR using FHIR APIs for COVID/lab reporting
- Developed features for Paragon EHR, focusing on interoperability (FHIR) and clinical data systems
- Conducted code reviews, mentoring, and process improvements
- Worked closely with product and support teams to resolve production issues
- Built and maintained systems for auditing, upgrades, and healthcare data processing
- Worked in distributed teams (US + India) delivering production-grade solutions
- Managed deployments and monitored systems using Azure services
